## Вступительное слово

Представляю вам второе издание серии "В зеркале масштаба 1/35". Как видно из названия, оно посвящено многобашенным советским танкам: увлечению военных первой трети прошлого века и символам мощи советского государства. Видовое объединение вызвано бедным ассортиментом изделий по предмету рассмотрения, даже не смотря на целую линейку свежих продуктов.

В обзор не включены ранние двухбашенные версии танка Т-26, так как этот прототип станет предметом отдельного издания.

Материал формировался на форуме [Panzer35](#) при живейшем участии коллег. Именно благодаря им удалось дополнить линейку продукции раритетными смоляными наборами, а также не пропустить изделия молодой отечественной фирмы Микродизайн. За что им всем моя большая благодарность.

Как и ранее, материал изложен в алфавитной последовательности фирм, а внутри – по возрастанию товарных индексов. Принцип оформления также остался прежним. Текст синего цвета и картинки в синей рамке являются ссылками на внешние ресурсы, зеленого - на внутренние. Если модель есть на сайте производителя, то на неё указывает ссылка на товарном индексе. Следуя традиции сайта [Scalemates](#), старался привести изображение бокс-арта или упаковки. В этом каталоге, дополнительно к обзорам моделей, даю ссылки на некоторые стройки, которые привлекли моё внимание. При возможности, указываю дату выпуска изделия или год первого найденного упоминания. В связи с небольшим объемом издания, посчитал излишним составление предметных указателей, ограничившись двумя уровнями оглавления.

И этот каталог, я планирую поддерживать в актуальном состоянии. Буду благодарен за предоставление недостающей или дополнительной информации по приведенным изделиям, которую размещу в последующих версиях (по вашему желанию, могу и с указанием источника). Равно как и за замечания, предложения и пожелания по оформлению и подаче материала. Которые учту в дальнейшее работе. Всё это вы можете направить на мой адрес [fromSalekhard@yandex.ru](mailto:fromSalekhard@yandex.ru)

PS. Изделия [Azimut Productions](#) я опять и принципиально игнорирую. Не считаю возможным рекомендовать вам изделия фирмы, которая под заказ, берет деньги и на этом прекращает общение. Даже после нескольких напоминаний. И хочу предупредить: не связывайтесь с Editions du Barbotin (minitracks на eBay) – явный жулик.

## Introduction

I present to you the second publication of the series "In the mirror 1/35 scale". As the name suggests, the publication focuses on multi-turret Soviet tanks: the passion of military the first third of the last century the symbols of power of the Soviet state. The items have been combined, as their selection is poor, despite a whole range of new products.

The review does not include the early two-turret versions of T-26 tank, for this prototype will be the subject of a separate publication.

The materials were developed on [Panzer35](#) forum with active contribution of colleagues. It's them who made it possible to extend the range with rare resin kits and take a notice of products by a young Russian company Microdesign.

I give many thanks to all of them.

Same as before, the materials are presented in alphabetic sequence of companies, under which the item indexes go in ascending order. The blue text and pictures in the blue box are links to external resources, green on the inside. If the model is on the manufacturer's website, then it indicates a link to a commodity index.

Following traditions of [Scalemates](#) website, I was trying to provide a boxart or packaging image. In this catalog, in addition to the review of the models I give links to certain assembly that caught my attention.

If possible, indicate the date of manufacture of the product or the year of the first mention found.

Since the edition is small, I considered it unnecessary to make the substantive pointers and just ensured a two-level table of contents.

I am planning to keep this catalog updated too. I will appreciate any missing or additional information on the presented models, which I shall include to the next versions (specifying the source, if you would like). Also, please make comments, suggestions, and requests in terms of layout and material presentation, which I will take into account for further work. Send all the feedback to my e-mail [fromSalekhard@yandex.ru](mailto:fromSalekhard@yandex.ru)

PS. The product [Azimut Productions](#) I again and basically ignored. I don't believe that I can recommend to you the company, which takes money under an order and cuts the communication right after. Even after a few reminders. And I want to warn: do not mess with the Editions du Barbotin (minitracks on eBay) - an obvious crook.
