Вступительное слово

Представляю Вам восьмое издание серии "В зеркале масштаба 1/35". Его предметом стали первые (но не все) малые (и не только) бронированные (за редким исключением) советские (без сомнения) гусеничные (абсолютно все) машины, т.е. часть прототипов не совсем точно соответствует наименованию китографии, но уж точно соответствует её духу.

Смысловое содержание его традиционно, а вот внутреннее наполнение и механизм создания — эксперимент. Новизна в том, что я его выкладывал сразу в процессе формирования, а не готовым материалом как ранее. И это сопровождалось публикациями в моём [блоге](#). А также в том, что все графические материалы размещены на моём [сайте](#).

Как и ранее материал формировался на форуме [Panzer35](#) при участии коллег. При этом должен отметить возросшую практическую ценность этого участия, за что всем большое спасибо!

Материал изложен в хронологическо-логической последовательности прототипов. Внутри разделов изделия также сгруппированы, в меру возможностей. Если изделие применяется для нескольких прототипов, то оно дублируется в каждом разделе.

Упрощено оформление за счет сокращения информации о фирмах-производителях. Для каждого изделия приводится только одно изображение, клик по которому приводит к переходу на соответствующую страницу электронного [каталога](#). А там уже размещено всё остальное. Следуя традиции сайта [Scalemates](#), старался привести изображение бокс-арта или упаковки.

Если изделие есть на сайте производителя, то на неё указывает ссылка на товарном индексе. Если у производителя есть действующий сайт, то на него указывает ссылка в наименовании.

И этот каталог, я планирую поддерживать в актуальном состоянии. Буду благодарен за предоставление недостающей или дополнительной информации по приведенным изделиям, которую размещу в последующих версиях (по вашему желанию, могу и с указанием источника). Равно как и за замечания, предложения и пожелания по оформлению и подаче материала. Которые учту в дальнейшее работе. Всё это вы можете направить на мой адрес fromSalekhard@yandex.ru

Обложка: плакат "Стальной лавиной раздавим врага". Художник В. Одинцов. 1941 г.

Introduction

I present to you the eighth edition of the series "In a 1/35 Scale Mirror". His subject was the first (but not all) small (and not only) armored (with some exceptions) Soviet (no doubt) tracked (absolutely all) vehicles, i.e. some prototypes do not exactly correspond to the name of kitography, but certainly correspond to its spirit.

Its semantic content is traditional, but the internal content and the mechanism of creation is an experiment. The novelty is that I laid it out immediately in the process of formation, and not with finished material as before. Moreover, all graphic materials are available only on my [site](#).

As before, the material was formed at the [Panzer35](#) forum with the participation of colleagues. At the same time, I should note the increased practical value of this participation, for which many thanks to all!

The material is presented in a chronological and logical sequence of prototypes. Inside the product sections are also grouped, to the extent possible. If the product is used for several prototypes, then it is duplicated in each section.

Design is simplified by reducing information about manufacturing firms. For each product there is only one image, a click on which leads to a transition to the corresponding page of the electronic [catalog](#). And everything else is already there. Following traditions of [Scalemates](#) website, I was trying to provide a boxart or packaging image.

If the product is on the manufacturer's website, then a link to the product index indicates it. If the manufacturer has a valid site, then a link in the name points to it.

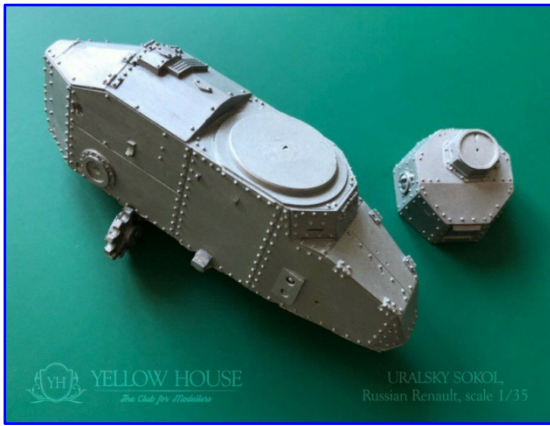

I am planning to keep this catalog updated too. I will appreciate any missing or additional information on the presented models, which I shall include to the next versions (specifying the source, if you would like). Also, please make comments, suggestions, and requests in terms of layout and material presentation, which I will take into account for further work. Send all the feedback to my e-mail fromSalekhard@yandex.ru.
