## Вступительное слово

Представляю Вам шестое издание серии "В зеркале масштаба 1/35". Оно опять отличается от предыдущих выпусков, хотя и посвящено военной тематике, но на этот раз представителю немецкой военной техники. У этого танка русский конструктор иранские заказчики и чешские производители. Эти танки воевали в Польше и Франции, составили треть танков вторгшихся в СССР. Кроме немцев, их вели в бой, в дальнейшем «братские», венгерские, словацкие, румынские и болгарские танкисты.

Как и ранее материал формировался на форуме [Panzer35](#) при участии коллег. Материал изложен не традиционно: не в алфавитной последовательности фирм, а по предметному принципу. Больше так делать не буду.

Принцип оформления остался прежним. Текст синего цвета и картинки в синей рамке являются ссылками на внешние ресурсы. Если изделие есть на сайте производителя, то на него указывает ссылка на товарном индексе. При возможности, указываю дату выпуска изделия. В связи с небольшим объемом, посчитал возможным разместить справочный материал, включающий как фотообзоры музейных экспонатов, так и подборки архивных фотографий.

Дополнительно, привожу ссылки для скачивания сводной информации по конкретным танкам в разрезе войсковых соединений, собранной и обработанной Алексеем Калининым, автором книги «Panzerkampfwagen 38(t). Конструирование и производство». Материалы размещаются по любезному согласию автора.

Также размещены примеры уже собранных моделей. Это не лучшие и не худшие образцы, это просто примеры.

И этот каталог, я планирую поддерживать в актуальном состоянии. Буду благодарен за предоставление недостающей или дополнительной информации по приведенным изделиям, которую размещу в последующих версиях (по вашему желанию, могу с указанием источника). Равно как и за замечания, предложения и пожелания по оформлению и подаче материала. Всё это вы можете направить на мой адрес [fromSalekhard@yandex.ru](mailto:fromSalekhard@yandex.ru)

PS. Только изделия [Azimut Productions](#) не попали в обзор. Не считаю возможным рекомендовать вам изделия фирмы, которая под заказ берет деньги и на этом прекращает общение. Даже после нескольких напоминаний. И хочу предупредить: не связывайтесь с Editions du Barbotin ([minitracks](#) на eBay) – явный жулик.

## Introduction

I present to you the sixth edition of the series "In the mirror 1/35 scale". It again differs from previous issues, although devoted to military topics, but this time the representative of the German military equipment. This tank Russian designer Iranian customers and Czech manufacturers. These tanks fought in Poland and France, made up a third of the tanks invading the USSR.

As before, the material was formed at the [Panzer35](#) forum with the participation of colleagues. The material is presented unconventionally: not in alphabetical sequence of firms, but on the subject principle. I won't do it again.

The blue text and pictures in the blue box are links to external resources. If the product is on the manufacturer's website, then it indicates a link to a commodity index. If possible, indicate the date of manufacture of the product or the year of the first mention found.

Due to the small volume, I considered it possible to place a reference material, including both photo reviews of Museum exhibits and collections of archival photographs. Additionally, here are links to download summary information on specific tanks in the context of military units, collected and processed by Alexei Kalinin, author of the book "Panzerkampfwagen 38(t). Design and production". The materials are placed by the kind consent of the author.

Examples of already assembled models are also available. These are not the best or worst examples, they are just examples.

I am planning to keep this catalog updated too. I will appreciate any missing or additional information on the presented models, which I shall include to the next versions (specifying the source, if you would like). Also, please make comments, suggestions, and requests in terms of layout and material presentation, which I will take into account for further work. Send all the feedback to my e-mail [fromSalekhard@yandex.ru](mailto:fromSalekhard@yandex.ru).

PS. Only products [Azimut Productions](#) were not included in this catalog. I don't think it is possible to recommend to you the products of the company, which takes order and money and then stops communication. Even after a few reminders. And I want to warn: don't mess with the Editions du Barbotin (minitracks on eBay) - an obvious crook.

1:35 WWII German Vehicle Wheel Mask Set  
LW35024

Tired of hand painting road wheels? Sick of using art templates that the circles just don't fit? Well, worry no more! Piece of cake now with the New-Works wheel mask set.

This is our 1:35 WWII German Vehicle mask set. It includes masks for more than 30 styrene kits, from an array of manufacturers. These masks will work for, but are not limited to the kits on the list below.

**Tamiya:**  
Panzer IV series; Marder series; Panther series; Famo; Hetzer; Wespe; Sd Kfz 232; Schwimmwagen; Citron Traction; Krupp Protze & 3.7cm Pak; Opel Blitz; Steyr 1500.

**Dragon:**  
Panzer I series; Panzer II series; Panzer III series; Panzer IV series; Panther series; Tiger I; Hetzer; 38(t) series; 8.8cm Flak 36 & 37; 2cm Flak38; 10.5cm Pz StL.

**Others:**  
Greatwall hobby SWS series; Tasca Panzer II ausf L; Bronco Sd Kfz.221.

Instructions:  
1. Spray edges of the wheel black, make sure all rubber areas are covered front and back.  
2. Fit the appropriate mask over the wheel, spray the open areas with vehicle color.  
3. Maintenance:  
Do not fold the masks. Masks should be kept flat in storage.  
Regular cleaning would be necessary to ensure prolong usage. Paint will build up around the inside circle, clean with lacquer thinner or other paint removing chemicals. Wash with water afterwards.  
The masks are stainless steel, no need to worry about rusting or material deterioration.

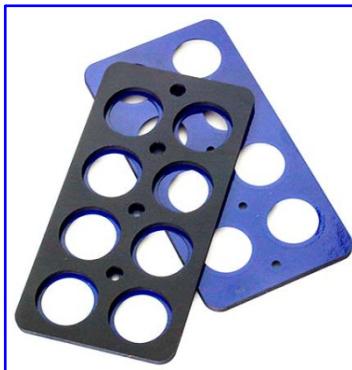

These wheel masks are reusable and will serve you for a long time to come. Hope they had made your AFV modeling experience a bit less tedious and a bit more enjoyable!

## RoyalModel 358 Spray masking stencil No. 2

Painting your model wheels is one of the most difficult and boring activities you can engage in... despite being extremely careful the results are not always satisfactory, specially were there is little or no raised separation between the rims and the tires. Using Royal Model's Spray Masking stencil No. 2 you can easily and quickly paint your wheels. Just apply the mask (photo #1) and spray on the rim color (photo #2). You will get the best results in a blink (photo #3).

**Tanks wheels 1/35 Scale guide.**

The list found below referring to tanks indicates which wheel frame corresponds to which mask from the stencil but it is only to be used as a guide as the masks numbered may also be used for more others tanks not listed. Naturally it will be your necessity to take advantage of these masks as much as possible they can also be used for the wheels of aeroplanes, cars, etc.

The screenshot shows the homepage of QIP.RU. At the top, there's a search bar with the placeholder "Ищем" and a blue "Найти" button. Below the search bar is a navigation menu with links like "Фото", "Фотографии", "Альбомы", "Видео", "Блоги", "Новости", "СМС-Тип", "Фотобанки", and "Поиск". On the left side, there's a sidebar with sections for "Логин", "Фотоподборки", "Порты", "Фото", "Запомни", "Регистрация", "Фотобанки", and "Фотографии". A large thumbnail for a photo titled "Альбом №28" is displayed, showing a man in a suit sitting at a desk. Below the sidebar are two more photo thumbnails: one for "Фотоальбом №1" (a person sitting in a field) and another for "Фотоальбом №2" (a landscape). The main content area features several photo galleries with thumbnails and titles like "Фотоальбом №28", "Фотоальбом №1", "Фотоальбом №2", "Фотоальбом №3", "Фотоальбом №4", and "Фотоальбом №5". Each gallery has a title, a thumbnail, and a link to view it.

There are photos of a Pz 38(t) of the Wehrmacht. The markings on the tank are of the 1st PzD. The Divisionskommandeur was Erwin Rommel during the France campaign. The tanks of this division can be distinguished as a rendering. A photo of the division, after it appeared and disappeared just as fast again.
