Вступительное слово

Уважаемые коллеги, вашему вниманию представляется попытка собрать в одном месте информацию обо всех наборах, дополнениях и конверсиях моделей танков Т-54/Т-55, а также зарубежных клонов и иной техники на их базе в масштабе 1/35: свыше сотни фирм и почти 600 изделий. Это не являлось первоначальной целью, а эволюционно выросло из обзора модели и дополнений к ней, который я вел на форуме [Panzer35](#). Надеюсь, первый блин получился не совсем комом и сей труд будет вам полезен.

2016 год не самое удачное время для такой работы: долгое затишье после выхода первых наборов **Skif**, **Tamiya**, **Trumpeter** закончилось массовым выпуском новинок **MiniArt**, **Takom**, **Meng** и других. Не все из них попали в обзор, но я не зря указал на обложке версию каталога. Планирую обновлять материал. Уже сейчас у меня есть чем его дополнить, но когда-то точку ставить надо, ибо модельная промышленность не стоит на месте и новинки появляются постоянно.

К сожалению, идет и обратный процесс. Одна из старейших модельных фирм **Verliden Productions** заявила о закрытии бизнеса. На сайте **Tank Workshop** висит объявление о продаже. Буквально на днях пропал сайт **Valkyrie Miniatures** и еще некоторые. **Inside the Armour**, судя по всему, сворачивает модельное направление. Есть много фирм, которые давно прекратили своё существование. Тем не менее, их продукцию я посчитал нужным включить в обзор. Некоторые из них еще попадают в продажу и обладают практической ценностью. Другие, безвозвратно канувшие в лету, представляют собой исторический интерес из области того, что я называю модельной археологией.

Я попытался сделать возможным использование этого каталога в двух видах: электронном (основном) и бумажном. Текст синего цвета, а также картинки в синей рамке являются ссылками на внешние ресурсы, зеленого - на внутренние. Если модель есть на сайте производителя, то на неё указывает ссылка на товарном индексе. Следуя традиции сайта **Scalemates**, старался привести изображение бокс-арта или упаковки. На модельных форумах всего мира отыскивал обзоры. При возможности, указывал дату выпуска изделия или год первого найденного

Introduction

Dear colleagues, for your attention is the attempt to gather in one place information about all the kits, add-ons, and conversion set for models of tanks T-54/T-55, him foreign clones and other machinery on their base in 1/35 scale: over hundreds of companies and almost 600 products. It was not the original purpose, and evolutionary grew out of a review of the model and aftermarket, which I kept on the forum [Panzer35](#). I hope that the first pancake turned out not quite lumpy, and this work will be useful for you.

2016 is not the best time for such work: long lull after the first kits from **Skif**, **Tamiya**, **Trumpeter** ended in a mass release of new products from **MiniArt**, **Takom**, **Meng**, and others. Not all of them is in the review, but the catalog version is not just shown on the cover. I have a plan to update the material. Already, I have some additional materials, but the stop is necessary, because the industry of modeling is not standing still and new items appear constantly.

Unfortunately, there is a reverse process. One of the oldest model companies **Verliden Productions** announced the closure of the business. On the website **Tank Workshop** hangs announcement of the sale. Just recently lost website **Valkyrie Miniatures** and some more. **Inside the Armour** stops the direction of modeling. There are many firms which have long ceased to exist. However, their products, I have included in my review.. Some of them have even come across a sale and have practical value. Other, irretrievably sunk into oblivion, represent the historical interest of the realm of what I call modeling to archaeology.

I tried to make it possible to use this in two forms: electronic (main) and paper. Blue text, blue frame images are links to external resources, green - on the inside. If the model is on the manufacturer's website, then it specifies the reference to the commodity index. Following the tradition of the **Scalemates** website, tried to bring the image of the box art or packaging. I have found the necessary reviews on forums all over the world. If

упоминания. Для редких изделий старался показать как можно больше изображений, иногда с инструкцией. Привожу и некоторые наборы фигурок, но только те, которые производитель прямо (в наименовании) или косвенно (на бокс-арте) привязывает к объекту обзора.

Позвольте выразить признательность всем коллегам с форума [Panzer35](#), благодаря интересу и вниманию которых и появилось это издание. Истинной кладезью информации стал сайт [Scalemates](#): я много взял с него, много и положил. Очень полезен сайт [ArmoramA](#). Хочу пожелать здоровья, долгих лет жизни и деятельности Terry Ashley, ведущему сайта [Perthmilitarymodelling](#), посетителем которого являюсь долгие годы. Не могу не упомянуть сайт [The Modelling news](#), обзоры которого я считаю образцовыми. Спасибо всем моделистам, которые нашли время и силы исследовать купленные модели и выложить обзоры для всеобщего доступа. Благодарю интернет-магазины и продавцов торговых площадок, в первую **eBay** и **Alibaba**, за размещенные графические материалы. Далеко не полный перечень сайтов я разместил в конце.

Как уже говорил, я планирую поддерживать этот каталог в актуальном состоянии. Вполне возможно, будут своды и по другим прототипам, в первую очередь из числа советской военной техники. Я был бы очень благодарен за замечания, предложения и пожелания по оформлению и подаче материала. Равно как и за предоставление недостающей или дополнительной информации по приведенным изделиям, которую размещу в последующих версиях (по вашему желанию, могу и с указанием источника).

Всё это вы можете направить на мой адрес fromSalekhard@yandex.ru

PS. Только изделия [Azimut Productions](#) не попали в обзор. Не считаю возможным рекомендовать вам изделия фирмы, которая под заказ берет деньги и на этом прекращает общение. Даже после нескольких напоминаний. И хочу предупредить: не связывайтесь с Editions du Barbotin (minitracks на eBay) — явный жулик.

possible, I indicate the date of manufacture of the product or the year of the first mention found. For rare products i tried to show more images, sometimes with instruction. I show some sets of figures, but only those that the manufacturer directly (in the name) or indirectly (on the box-art) binds to the object of this review.

I want to express my gratitude to all my colleagues from the forum [Panzer35](#), for their interest and attention, and as a result of which appeared this edition. The true wealth of information has become [Scalemates](#) site: I took a lot from him, and put a lot. Very useful site [ArmoramA](#). I wish health, long life and activity for Terry Ashley, founder [Perthmilitarymodelling](#) site. I visit this site in a long time. I want to say about the site [Modelling news](#). I think, it reviews is perfect. Thanks to all modelers, who took the time and opportunity to explore the kits and lay surveys for public access. Thank you to online shopping and sellers trading platforms, primarily **eBay** and **Alibaba**, for placed pictures. At the end it is I placed entirely not complete list of sources.

As already mentioned, I plan to keep this catalog up to date. Maybe then will the arches and other projects from among the Soviet military equipment. I would be very grateful for the comments and suggestions on the design and format of the material. As well as for the provision of missing or additional information on the listed products, which is available in the following versions (if you wish, I can with the source).

All that you can send to my email fromSalekhard@yandex.ru

PS. Only products [Azimut Productions](#) were not included in this catalog. I don't think it is possible to recommend to you the products of the company, which takes order and money and then stops communication. Even after a few reminders. And I want to warn: don't mess with the Editions du Barbotin (minitracks on eBay) - an obvious crook.

Предисловие ко второму изданию

Прошло почти 3 года с момента публикации первой версии этой китографии. В прошлом году, в связи с некорректным переездом хостинга изображений пришлось выпустить промежуточную версию с обновленными ссылками всех картинок. Именно это событие сподвигло меня на создание своего сайта и размещения там всех моих китографий.

Милости прошу на сайт "[...в зеркале 1/35 масштаба](#)".

Эта версия изрядно подсокращена. Информация о фигурках советских/российских танкистов была удалена, т.к. для них был создан отдельный каталог.

Иностранцев пока сохранил.

Снесено почти 20 страниц справочного материала, ранее размещенного в конце.

Во-первых, это реально никто не смотрел и не использовал, а во-вторых китография полностью перенесена в категорированный интерактивный каталог с хорошими условиями поиска.

Тем не менее, "книжка" распухла на те же 20 страниц.

Количество представленных фирм и продуктов увеличилось в полтора раза, до 141 первых и до 800 вторых.

Часть добавочного материала пришлось на новые модели и здесь нельзя не отметить плодovitую украинскую фирму MiniArt. За что им огромное спасибо. Другую часть составили так называемые археологические находки, обнаружение которых доставляет мне большое удовольствие, но приносит мало практической пользы модельстам.

Пришлось немного оптимизировать размещение материала. Надеюсь без потери наглядности.

Пользуйтесь, моделируйте.

А я продолжаю ждать, пока еще безрезультатно, предложения, пожелания, материалы и т.д. на адрес fromSalekhard@yandex.ru.

Preface to the second edition

Almost 3 years have passed since the publication of the first version of this kitography. Last year, due to the incorrect relocation of image hosting, I had to release an intermediate version with updated links of all images. This event inspired me to create my own website and posting there all my kitography.

Welcome to the website." [...in the mirror 1/35 scale](#)".

This version is considerably reduced. Information about the figures of Soviet/Russian tank has been removed, because it was created as a separate publication.

Foreigners until retained.

Nearly 20 pages of reference material previously posted at the end have been demolished.

Firstly, no one really looked or used it, and secondly, the cetography was completely transferred to a categorized interactive catalog with good search conditions.

However, the "book" swelled on the same 20 pages.

The number of represented firms and products increased one and a half times, up to 141 first and up to 800 second

Part of the additional material fell on the new models and here it is impossible not to note the prolific Ukrainian company MiniArt. For which many thanks to them. The other part consisted of so-called archaeological finds, the discovery of which gives me great pleasure, but brings little practical benefit to modellers.

I had to slightly optimize the placement of the material.

I hope without losing clarity. And I continue to wait, for the time being to no avail, suggestions, requests, pictures, etc. to address fromSalekhard@yandex.ru.
