Вступительное слово

Уважаемые коллеги, вашему вниманию предлагается очередной выпуск каталога, посвященный, на этот раз, советским тяжелым танкам "Иосиф Сталин" и машинам на их базе. 75 страниц на которых выложена информация о почти 350 изделиях 94 фирм. Я надеюсь, что эта информация поможет вам в нашем общем хобби.

Как и всегда, материал формировался на форуме [Panzer35](#) при активном участии коллег. За что им всем моя большая благодарность.

Не смотря на принадлежность к одному виду, танки этого обзора очень различны: между первой и последней машинами нет вообще ничего общего! Последняя вообще утратила свою знаменитую аббревиатуру. Единым остается их монументальность и brutality.

Как и ранее, материал изложен в алфавитной последовательности фирм, а внутри – по возрастанию товарных индексов. Принцип оформления также остался прежним. Текст синего цвета и картинки в синей рамке являются ссылками на внешние ресурсы. Если модель есть на сайте производителя, то на неё указывает ссылка на товарном индексе. Следуя традиции сайта [Scalemates](#), старался привести изображение бокс-арта или упаковки. При возможности, указываю дату выпуска изделия или год первого найденного упоминания. В связи с небольшим объемом издания, посчитал излишним составление предметных указателей.

И этот каталог, я планирую поддерживать в актуальном состоянии. Буду благодарен за предоставление недостающей или дополнительной информации по приведенным изделиям, которую размещу в последующих версиях (по вашему желанию, могу и с указанием источника). Равно как и за замечания, предложения и пожелания по оформлению и подаче материала. Которые учту в дальнейшее работе. Всё это вы можете направить на мой адрес fromSalekhard@yandex.ru

PS. Изделия [Azimut Productions](#) я опять и принципиально игнорирую. Не считаю возможным рекомендовать вам изделия фирмы, которая под заказ, берет деньги и на этом прекращает общение. Даже после нескольких напоминаний. И хочу предупредить: не связывайтесь с Editions du Barbotin (minitracks на eBay) – явный жулик.

Introduction

Dear colleagues, you are invited to issue another catalog, dedicated, this time, to the Soviet heavy tanks "Joseph Stalin" and the machines based on them. 77 pages on which information about almost 350 products of 94 firms is posted. I hope that this information will help you in our common hobby.

As always, the material was formed at the [Panzer35](#) forum with the active participation of colleagues. For which they all my greatest gratitude.

Despite belonging to a single species, the tanks of this review are very different: between the first and last machines there is nothing in common! The latter generally lost its famous abbreviation. One remains their monumentality and brutality.

Same as before, the materials are presented in alphabetic sequence of companies, under which the item indexes go in ascending order. The blue text and pictures in the blue box are links to external resources. If the model is on the manufacturer's website, then it indicates a link to a commodity index.

Following traditions of [Scalemates](#) website, I was trying to provide a boxart or packaging image. In this catalog, in addition to the review of the models I give links to certain assembly that caught my attention.

If possible, indicate the date of manufacture of the product or the year of the first mention found.

Since the edition is small, I considered it unnecessary to make the substantive pointers.

I am planning to keep this catalog updated too. I will appreciate any missing or additional information on the presented models, which I shall include to the next versions (specifying the source, if you would like). Also, please make comments, suggestions, and requests in terms of layout and material presentation, which I will take into account for further work. Send all the feedback to my e-mail fromSalekhard@yandex.ru.

PS. The product [Azimut Productions](#) I again and basically ignored. I don't believe that I can recommend to you the company, which takes money under an order and cuts the communication right after. Even after a few reminders. And I want to warn: do not mess with the Editions du Barbotin (minitracks on eBay) - an obvious crook.
